

## Evaluation report

As Lithuanian national team of six young people participated in Peheli4All project in Pissouri, Cyprus during the period of May 25 th to June 3rd 2025, us as leaders Agne Ziziene and Ingrida Pociute witnessed their enthusiasm and focus on the subject during the project. Participants were active, communicative with other participants and responsible when it came to attending activities and wise during them. They showed their interest in each activity presented and respect towards the facilitators, other participants and general instructions and rules applied. As for leaders the group was easily managed, participants also had to experience thinking 'outside the box', leaving their comfort zones, opening up which was a great experience to lead them through the process and realise how young people gain growth during such experiences.

Report and follow up activities were done shortly after returning from the project in school of 'Tekme'. The national team were responsible for making the video presentation of all the activity days during the project, presenting the energiser game and teaching a Hungarian dance. As for the reflection part the participants were happy to share with their peers their experience and introduce what the Erasmus experience was like which no doubt intrigued those who listened. Such a task was a great way for participants to reflect on their experience and knowledge while sharing with their peers the concept of Erasmus youth exchanges and this particular project's subject.

Project management met our expectations and needs from the first day that we started it, it was done precisely and responsibly with great attention to details, subject matter, timing, outcomes. Our team has nothing to mention on what could be done better as we were completely satisfied, included, informed and also inspired on many different levels. The project's subject and activities that were planned in Hylatio, Pissouri and Limassol were very well thought through and these locations are perfect for such projects. As for other partner countries, we felt and saw that this project is about inclusion, breaking the stereotypes, cultural boundaries and greatly impacting the growth for all.

Sincerely,

Lithuanian national team leader Ingrida Pociute
