PARTNER ORGANISATION EVALUATION LETTER

I, Zsolt Péter Függ, the chairman of Eurotender Association, participating in the project "Peace and Healthy Lifestyle for all" under the Agreement No: 2024-1-CY01-KA152-YOU-000216768, as a partner organization, officially confirm that our Association is glad to have had the opportunity to be in this partnership, and we evaluate the project as a highly successful one.

We joined this project because we wished to contribute to measures and initiatives which have the potential to develop overall quality and effectiveness of youth work, particularly in promoting personal and collective peace through healthy lifestyle practices. The participants brought back invaluable knowledge and connections while gaining unforgettable experiences. The mobility was hosted by excellent facilitators in Cyprus, who made our participants engage actively in all activities and discussions covering mental health awareness, physical wellness, conflict resolution techniques, and peacebuilding initiatives. Our preparation activities were particularly meaningful, as we conducted deep research about peace in Hungarian society, examining both community-level and individual inner peace. We explored the challenges facing our society, including discrimination and its impact on well-being, while also identifying local NGOs and peacebuilding initiatives. We discussed the vital connection between mental and physical health, recognizing how they mutually influence each other.

After their return, our participants successfully implemented comprehensive follow-up activities. In June we organized a Family Day at Hódmezővásárhely with our local Roma youth community, reaching 72 participants. The event included healthy cooking demonstrations, herb and vegetable planting workshops, and social circus performances, effectively transferring the knowledge gained about healthy living and community peace to local families.

The individual feedback from our participants demonstrates the profound impact of this exchange. Our young people reported significant personal growth, improved self-awareness, enhanced leadership skills, and better understanding of the relationship between physical and mental well-being. Many participants noted improvements in their English language skills and gained confidence in presentation and performance abilities.

This project perfectly aligned with Eurotender Association's mission to support disadvantaged groups and foster social cohesion, particularly benefiting our Roma youth participants who gained valuable tools for promoting health and peace in their communities. The experience has strengthened our capacity to address youth wellness and peacebuilding through non-formal education methods.

Sincerely,

Dél-Alföldi Eurotender, Ifjúsági,
